JFK assassination records appeals Harold Weisberg 9/15/79
The Director's Notes → unoriginal copies provided

Throughout 62-109090, which is a Commission file, there is substitution for records annotated by the Director. I attach as an illustration the Not Recorded Serial of 1/21/64, Malley to Roemn.

It is apparent that the notations are not in the Director's distinctive handwriting.

His comments, opinions and directives are all of considerable historical significance.

There appears to be no reason why these copies could not have been xeroxes of the actual record he read and annotated. That is normal practise with other records and copies.

Of course I have a separate interest in what is not undeviating FBI practise now, "We should not [redacted] indicate any reluctance to making anything available at any time or place."
